Assessment: How Far Did They Travel?

(page 1 of 2)

Answer the questions below and show your solutions. Write an equation for each problem. Remember, both families set their trip meters at 0 before they started.

1a. The Johnson family traveled to Yosemite National Park. At the gas station, the trip meter read 37 miles. At the Tourist Information Center, the trip meter read 100 miles. How far did they travel from the gas station to the information center?

1b. When the Johnson family reached Yosemite National Park, the trip meter on their car read 125 miles. How far did they travel from the <u>gas station</u> to the <u>national park</u>?
