## **Finding Fair Shares**

## End-of-Unit Assessment

1. Imagine that you have 7 brownies to share equally among 5 people. How many brownies will each person get? Explain how you got your answer.

**2.** Each bag holds 24 apples. Kim collected  $\frac{1}{3}$  of a bag. Philip collected  $\frac{2}{4}$  of a bag. If they put all their apples together, would Kim and Philip have 1 whole bag?
