

# What's My Shape?

## You need

- *Geometric Solids*

## Play with a partner.

- 1 Choose a secret polyhedron (a shape with flat sides only) from the shapes on *Geometric Solids*.
- 2 Write the name of the polyhedron you chose on the back of this sheet or on another sheet of paper.
- 3 Write a description of the solid that will help someone guess the polyhedron you chose. Write at least two characteristics of your solid.

For example: My polyhedron has exactly 6 square faces and 8 corners. (My polyhedron is a cube.)
